Available as of v1.1.0

VM can be cloned with/without data. This function doesn't need to take a VM snapshot or set up a backup target first.

Clone VM with volume data

1. On the `Virtual Machines` page, click `Clone` of the VM actions.

2. Set a new VM name and click `Create` to create a new VM. clone-vm-with-data.png

Clone VM without volume data

Cloning a VM without volume data creates a new VM with the same configuration as the source VM.

1. On the `Virtual Machines` page, click `Clone` of the VM actions.
2. Unclick the `clone volume data` checkbox.

3. Set a new VM name and click `Create` to create a new VM. clone-vm-without-data.png
